

### **Pullman Local Style**

Pullman Local Style Daters or numberers are made to carry a customized rubber die before or after the date or numbering band section. These customized rubber dies often contain company logos, inspection symbols, or multiple words that are not easily duplicated on Pullman bands. Standard character sizes range from 1/8" to 1/4". Larger sizes available upon request.

### **Pullman Dater**

Pullman Line Daters provide the largest selection of sizes and styles for conventional or special dating needs. Sizes range from 1/8" to 1". All standard daters come with abbreviated month bands Jan-Dec, two number bands 0-9 for days, and a year band. Year bands run for 6 consecutive years. Many customized combinations (including letter or number bands) are available.

### **Pullman Numberer**

Pullman numbering stamps are the most popular and versatile band numberer available. By customizing the machine with any combination of letter (A-M or N-Z) or number (0-9) band you can mark part numbers, serial numbers, date codes, and other information that changes regularly. You can have as few as two bands, or as many as you need to meet your application. Sizes range from 1/16th" high to 1 1/4" characters.

### **Pullman-AAG**

Pullman-AAG machines offer the maximum in versatility for coding, pricing and identification marking. These bands hold 36 positions (A to Z and 0 to 9). Any combination of wording and numbers is at your fingertips. Sizes range from 1/16" to 3/8" characters.

### **Pullman-AG**

Pullman-AG machines are supplied with alphabet bands containing 28 characters (A to Z and a period and dash or number bands 0 to 9 repeated twice and extra characters). This versatile machine allows users to spell out single line words and number combinations to meet that specific marking requirement. Sizes range from 1/16" to 3/8" characters.
