

SMD Reel Rack 20 reel
20 Reel Rack Max. Reel width 42mm

The tarapath SMD reel racking system is an efficient and economical solution for the transport and storage of the most commonly available SMD reels in the electronics industry today.

The racks with their chrome plated wire and modular design are light and easily stacked to any configuration to suit your requirements. Rack modules are available in two sizes and three reel spacings. The reel spacing will accept a number of reel widths up to the designated spacing.
