

Moisture Barrier Bags

Excellent in EMI/RFI static field shielding, these bags are water vapor proof and grease proof. Used as packaging of electrostatic/humidity sensitive parts, disk drives, flat pack etc. Heat sealable, moisture barrier bags are made from a multilayer metallized film. We suggest to place inside the barrier bags a moisture desiccant bag to eliminate the residual moisture, and HID cards.

Specifications:

- Film complying: MIL-B-81705G class 1 TC1 SBM356
- Film thickness: 85mm
- Surface resistivity: $<10^{12}W$
- Electrostatic decay: $< 2sec$
